

シーナカリンウィロート大学 × 東京医科歯科大学 オンライン・ディスカッション・カフェ Let's talk about life during and after 2020.

What is Discussion Café?

DCafé provides a rich environment for discussion in English of current controversial topics. This is a fantastic opportunity to network with students from Japan and Thailand and practice expressing your opinions in English!

Discussion Topics

1. Changes in dental medicine/ practice during and after COVID-19:

COVID-19 has made a significant influence on dental medicine/practice. It may be infection prevention, remote medicine, dental education, occupational fields as a dentist, and so on.

The disruption of COVID-19 has forced a change in the environment of dentistry. How did or will dental education or dental practice change around you? Did people around you change their ideas about dentistry? Please share your experience and let's discuss the future dental medicine/practice in the era of "new normal". What shall we do and suggest as young healthcare professionals of next generation?

2. Our school life after 2020:

What is necessary and what is unnecessary in our school life? Did you change your notion? COVID-19 made great impacts on the world in many aspects. Our lifestyles were forced to change in order to stop the pandemic, and what we took for granted before was no longer "Normal" today. However, this change is also an opportunity for us to reconsider our lifestyles and provide new ideas. Examples are remote-work (work from home), distance learning provision...so, what about your school life? Let's discuss together about the "New normal" university student life and make recommendations!

Discussion Café is the place where students express their opinions freely and exchange their insights with each other, so the question is quite simple: What do you think?
